Welcome Address

by the Congress President

Dear colleagues,

I would like to extend a warm welcome to all participants of the 3rd EFCAP Congress. As the congress president I am very happy about your interests and numerous abstract submissions for symposia, oral presentations and posters. They are all part of a very diverse and interesting scientific programme. We made a special effort to satisfy the wish for more abstract submissions from professionals all over Europe and to not only focus on diagnostics and risk assessment, but also psychotherapy and intervention. Forensic child and adolescent psychiatry seeks an open exchange with colleagues from the judicial branch, social work and other professions that deal with delinquent juvenile offenders or victims of adolescent crime in practice and research. In order to prioritize the interdisciplinarity and to give the members of the Deutsche Vereinigung für Jugendgerichte und Jugendgerichtshilfen e.V. (DVJJ, German Association for Juvenile Courts and Legal Protection for Minors) an opportunity for an exchange with you as European professionals, we have organized a special German day in cooperation with the DVJJ in addition to the regular scientific programme. We are pleased that EFCAP has begun to consistently develop and organize itself throughout Europe. As part of their future plans for health research the European Union is discussing an invitation to tender for a programme about antisocial behaviour and developmental pathways of conduct disorders. Thus, besides the practical approach and international networking, we also need to focus on the development of research partnerships among EFCAP.

I hope you will also enjoy Berlin with its various cultural offerings. I would be delighted to welcome you to the Congress Dinner Party at the Umspannwerk Ost – an old electric transformer plant and therefore special location. With multiple floors the premises enable guests to party and dance, but to also have quiet conversation with colleagues. Good research and good practice thrive on exchange and exchange happens especially during informal contacts, such as the Get-Together and Congress Dinner Party.

I would like to thank my employees and colleagues, the scientific secretaries, PD Dr. Kölch and Dr. Allroggen, my personal assistant, Dr. Bleich, my head secretaries, Mrs. Gürntke and Mrs. Weisenheimer, as well as the team of CPO HANSER SERVICE GmbH for all of their hard work in preparation for this congress.

I hope for three successful congress days and look forward to meeting you.

Prof. Dr. med. Jörg M. Fegert

Liebe Kolleginnen und Kollegen,

herzlich willkommen in Berlin zum 3rd EFCAP Congress. Als Kongresspräsident bin ich froh über Ihr Interesse und die zahlreichen Anmeldungen von Symposien, Vorträgen und Postern, die ein sehr vielschichtiges und hoffentlich für jeden Teilnehmer interessantes Programm ergeben haben. Wir haben uns bemüht, dem Wunsch nach mehr Beiträgen aus Europa und nach einem stärkeren Fokus, nicht nur bei der Diagnostik und Risikoerkennung, sondern auch bei der Therapie und Intervention, gerecht zu werden. Forensische Kinder- und Jugendpsychiatrie lebt vom Austausch mit Kollegen in der Justiz, der sozialen Arbeit und anderen Berufen, die sich mit straffälligen Jugendlichen oder mit Opfern der Jugendkriminalität in der Praxis oder der Forschung beschäftigen. Um diese Interdisziplinarität zu betonen und den Mitgliedern der Deutschen Vereinigung für Jugendgerichte und Jugendgerichtshilfen e.V. (DVJJ) die Möglichkeit zum Austausch mit Ihnen als europäischen Experten zu geben, haben wir zusätzlich zum allgemeinen Programm einen deutschen Tag zusammen mit der DVJJ organisiert. Erfreulich ist, dass EFCAP sich europaweit immer stärker organisiert und entwickelt. Die Europäische Union diskutiert bei den Plänen für die zukünftige Gesundheitsforschung erstmals die Ausschreibung eines Programms zur Störung des Sozialverhaltens und antisozialer Persönlichkeitsstörung, so dass neben der praktischen Arbeit und der internationalen Vernetzung der Aufbau von Forschungskontakten ebenfalls im Fokus unserer Zusammenarbeit in EFCAP stehen sollte.

Ich hoffe, Sie genießen Berlin auch mit seinen vielfältigen kulturellen Angeboten. Ich würde mich freuen, wenn Sie alle zur Kongressparty ins Umspannwerk, einer ganz speziellen Location, kommen. Die Räumlichkeiten ermöglichen sowohl ausgelassenes Feiern und Tanzen als auch ruhige Unterhaltung, da uns mehrere Stockwerke zur Verfügung stehen. Gute Forschung und gute Praxis leben vom Austausch, und Austausch geschieht gerade auch bei informellem Kontakt, wie bei der Eröffnungsfeier oder der Kongressparty.

Meinen Mitarbeiterinnen und Mitarbeitern, den Scientific Secretaries, PD Dr. Kölch und Dr. Allroggen, meiner persönlichen Referentin, Dr. Bleich, meinen Chefsekretärinnen, Frau Gürntke und Frau Weisenheimer, sowie dem Team von CPO HANSER SERVICE GmbH danke ich für ihren Einsatz bei der Vorbereitung.

Ich hoffe auf drei erfolgreiche Kongresstage in Berlin und freue mich sehr, Sie zu treffen.

by the EFCAP | Europe President

Dear colleagues,

until 2001 our world seemed to be manageable and child and adolescent psychiatric disorders triggered us to identify their etiological bases and to develop new treatment approaches. Then the world changed and everybody, including mental health professionals, were increasingly confronted with terror, crime, immigration, discrimination and economic crisis. Which meant that the 'environmental factors' changed a lot in the nature versus nurture concepts. Forensic child and adolescent psychiatry and psychology became more important in the mental health field to provide an increasing awareness of the impact of psychiatric disorders on delinquency patterns, an increasing insight in brain functioning in deviant behaviours in youths, and increasing treatment effects when families are involved in the management of juvenile criminal behaviour.

We focus on the neurobiological structure of the terrorist and his victims, we compare traditional treatment methods like cognitive behaviour therapies with family oriented therapies, and we evaluate alternative sanctions focusing at specific brain regions which have been visualized by modern techniques. We also perform in-depth research into youths from ethnic minority groups and find out what the court procedure mechanisms are which are responsible for longer sentences in less serious and less disordered cases than are found in non-minority children.

All aspects of our work are presented in keynote sessions, symposia, oral presentations and posters. It provides an excellent opportunity for colleagues from all around the world to get together again. We need to widen our view, exchange experiences, but also intensify our network. Personally, I learned a lot by visiting the child and adolescent Mecca in London with my students, from my collaborative work with French, Swiss and Belgian colleagues in the Evans project (which was presented in Basel), from my teaching activities in Moscow and Helsinki, and from my inspiring visit to the youth detention centre of Coimbra (Portugal). These are just a few collaborations within the EFCAP network that were all initiated through contacts I made and people I met during the last two EFCAP congresses and other related meetings, such as ESCAP, IALMH and EAFL.

I hope you will all find inspiration, make many new alliances, engage in exchanges on the level of research and practice, and create innovative ideas in order to provide our problematic youths with a better future!

Prof. Dr. Theo Doreleijers

Liebe Kolleginnen und Kollegen,

im Jahr 2001 schien unsere Welt noch kontrollierbar zu sein. Psychiatrische Verhaltensstörungen bei Kindern und Jugendlichen haben uns veranlasst, deren Ursprung zu identifizieren und neue Behandlungsansätze zu entwickeln. Dann änderte sich die Welt und alle, auch das Fachpersonal im Bereich der psychiatrischen Gesundheit, wurden vermehrt mit Terror, Kriminalität, Zuwanderung, Diskriminierung und wirtschaftlichen Krisen konfrontiert. Die sich beeinflussenden Umweltfaktoren im Konzept des angeborenen versus gelernten Verhaltens haben sich verändert. Um eine verstärkte Sensibilisierung im Umgang mit den Auswirkungen von psychischen Störungen auf das Verhalten von jugendlichen Straftätern zu bewirken, um neue Erkenntnisse in Bezug auf die neurologischen Funktionen bei sozial unangepasstem Verhalten bei Jugendlichen zu gewinnen und um Behandlungseffekte zu verbessern, wenn Familien in das Management von jugendlich-kriminellem Verhalten mit einbezogen werden, erlangt die Forensische Kinder- und Jugendpsychiatrie und Psychologie im Bereich der seelischen Gesundheit eine immer größere Bedeutung.

Wir konzentrieren uns auf die neurobiologische Struktur von Terroristen und deren Opfer. Wir vergleichen traditionelle Behandlungsmethoden, wie z.B. kognitive Verhaltenstherapie, mit familien-orientierten Therapien. Wir begutachten alternative Sanktionen, die sich auf spezielle Bereiche des Gehirns auswirken, die durch moderne Technik sichtbar gemacht wurden. Ganz besonders erforschen wir intensiv die gerichtlichen Verfahrensweisen bei ethnischen Minderheiten, um herauszufinden, warum bei weniger schwerwiegenden und weniger verhaltengestörten Fällen das Strafmaß trotzdem höher ausfällt als bei Jugendlichen, die nicht zu ethnischen Minderheiten zu zählen sind.

Alle Aspekte unserer Arbeit werden in Keynote Sitzungen, Symposien, Freien Vorträgen und Postern vorgestellt, und der Kongress stellt eine ausgezeichnete Möglichkeit dar, mit Kollegen aus aller Welt zusammenzukommen. Wir müssen unser Blickfeld erweitern, Erfahrungen austauschen und auch unsere Netzwerke ausbauen. Ich persönlich habe viel von den Besuchen mit meinen Studenten in London (dem Mekka für Kinder- und Jugendpsychiatrie) gelernt, in der Zusammenarbeit mit französischen, belgischen und schweizerischen Kollegen beim Evans Projekt (welches in Basel vorgestellt wurde), bei meiner Lehrtätigkeit in Helsinki und Moskau und bei meinem Besuch in der Jugendstrafanstalt in Coimbra (Portugal). Dies sind nur einige Kooperationen im Rahmen des EFCAP Netzwerks, die auf Grund meiner Kontakte während der letzten beiden Kongresse und bei anderen Meetings, wie z.B. ESCAP, IALMH und EAFL, entstanden sind.

Ich hoffe, dass Sie sich inspirieren lassen, neue Kontakte knüpfen, sich über Forschung und Praxis austauschen und neue, innovative Ideen einbringen, um unseren Jugendlichen eine bessere Zukunft zu bieten.

EFCAP | EUROPE is the umbrella organization for European Forensic Child and Adolescent Psychiatry, Psychology and other involved Professions, with members in Europe (Austria, Belgium, Cyprus, Finland, France, Germany, Hungary, Italy, The Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey and the United Kingdom) as well as Australia, New Zealand, Republic of Korea and United States.

The aims of **EFCAP | EUROPE** are:

- ▶ to improve the assessment and treatment of children and young people who find themselves in the justice system as well as their families and carers
- ▶ to improve facilities and to facilitate joint international scientific research
- ▶ to promote interdisciplinary training and interdisciplinary education
- ▶ to exchange data obtained from research and to exchange practical experiences and innovative research and treatment methods
- ▶ to gather information on and to contribute to national and European policy, in so far as this policy affects young people
- ▶ to raise awareness of the need for constant change in the criminal and civil justice systems, so as to provide as well as possible for the interests and the development requirements of children and young people

New Research Poster/9 March 2012

For the first time at the EFCAP Congress in Berlin young forensic researchers had the opportunity to submit latest research posters for a poster session on Friday, 9 March 2012. This gives young forensic researchers the chance to communicate their first results or to describe and discuss new study designs, especially since the EFCAP congress provides an opportunity to discuss new developments with colleagues and experts from all over Europe and many other countries around the world. The posters are displayed on Friday, 9 March, from 10:00 to 17:00 h.

How to get to the Congress Venue

Arriving by air ► From Tegel Airport take the TXL bus to Karlplatz, from where it is approximately 3 minutes by foot in the direction of the Charité. From the opposite side of the street (Schumannstr./Luisenstr.) you can also take Bus 147 for one stop to the Charité-Campus Mitte bus stop. The bus stops directly in front of the Langenbeck-Virchow-Haus.

From Schönefeld Airport take the shuttle bus to the train station Flughafen Berlin-Schönefeld. From here take the regional train RB22 to Friedrichstraße or S-Bahn S9 to Ostkreuz and then S5 to Friedrichstraße; here take Bus 147 (towards Leopoldplatz) as far as the Charité-Campus Mitte bus stop. The bus stops directly in front of the Langenbeck-Virchow-Haus.

Transfer times by taxi:

Tegel Airport: approximately 20 minutes
Schönefeld Airport: approximately 50 – 60 minutes

Arriving by train ► From the main railway station (Hauptbahnhof) take Bus 147 towards Puschkinallee as far as the Luisenstraße/Charité bus stop. The bus stops directly in front of the Langenbeck-Virchow-Haus. From Ostbahnhof take the S-Bahn S5, S7 or S75 as far as Friedrichstraße, and from there Bus 147 (towards Leopoldplatz) as far as the Charité-Campus Mitte bus stop.

Thursday, 8 March 2012, 19.30 – 1.30 h · Umspannwerk Ost

Buffet dinner and beverage package incl. house wine, beer, water and coffee during dinner

The restaurant is located in the Eastern part of Berlin, close to Alexanderplatz in an old transformer plant. The impressive ceiling height, the old gallery and the glazed hall gates create a special atmosphere and character. The focal point in the Umspannwerk Ost is the 10 meter bar and the buffet with its old iron and electric braces. The show kitchen offers a free view from all sides and is located on the ground level of the restaurant.

After dinner the party will be continued in the theatre club, which you will find in the basement. It has an urban, yet cosy feeling with its visible constructional elements, moulded riggers, granite plinths and the exposed brickwork. Party the night away or enjoy another glass of wine in the main restaurant. We are looking forward to sharing this special evening with you.

Cost contribution:

EUR 50,00 for congress participants

EUR 25,00 for active participants (chairs, co-chairs, speakers)

Promenade tickets (entrance fee)

22.00 – 01.30 h ► EUR 10,00

Art Exhibitions

Speechless

The art exhibition *Speechless* (*Wortlos*) will present some of its exhibits and art projects from 7 until 9 March 2012 at the Langenbeck-Virchow-Haus as part of the 3rd EFCAP Congress 2012. We are pleased about the initiative by the Vivantes Child- and Adolescent Psychiatry and Psychotherapy Department to raise the awareness of young people, who try to fight their way back to a healthy life with the help of their fantasy and creativity.

Art – with its countless ways of expression – gives voice to the feelings and thoughts of their creators. Art can make visible, what would otherwise remain hidden inside. The feeling of creating something new is an ideal tool on the path to a

healthier life. It also enables children and adolescents to give voice to feelings and thought about traumatising events that can otherwise not yet be verbalized.

Every piece of art represents the artist's opportunity to turn away from anger and grief and actively create something new. This art exhibition is a collection of pictures, paintings and sculptures, where every piece has the power to touch the viewer's heart.

Sculpture Exhibition by Anna Skrabal

Anna Skrabal was born in Wolfsberg, Austria. In 1988 she moved to Vienna, where she studied medicine at the University of Vienna and sculpting with Professor Karl Sukopp. Since then her life has been deeply influenced by the interaction between art and medicine. She became a Doctor of General Medicine and a Specialist in Child and Adolescent Psychiatry and Psychotherapy – a healer of both body and soul. In former

times, she might have been called a Shaman. Many Shamans used and use sculptures in their healing practices. Similar to that, the primarily mutual conception of both of her missions became one: creating healing, awareness, balance and harmony.

In this art show Anna Skrabal presents results of this process. She arranged an exhibition about violence, sexual abuse and their outcome. In this manner these topics find their way into the world of bronze sculptures. Experience in this exhibition how sculptures can be an instrument to make the world a better place.

In this age of showy spectacle and eye-popping commercial entertainments, (...) the story-telling bronze figures of Austrian artist Anna Skrabal, fraught with sociological, psychological, and philosophical underpinnings, are a godsend.

Deutsches Symposium

Freitag, 9. März 2012

Täter und Opfer (sexueller) Gewalt

Wer in seinem beruflichen Umfeld mit Kindern und Jugendlichen zu tun hat, wird auch mit dem Thema Jugendgewalt und sexuelle Gewalt durch Jugendliche konfrontiert. Das Deutsche Symposium „Täter und Opfer (sexueller) Gewalt“ richtet sich daher an alle Berufsgruppen, die mit Kindern, Jugendlichen und Heranwachsenden arbeiten. Es werden Vorträge und Workshops angeboten zu Entstehungsbedingungen und Folgen von Gewalt, zum Zusammenhang von psychischen Erkrankungen und aggressivem Verhalten, zur Gutachtenerstellung und zu juristischen Aspekten von Jugendgewalt.

Angeboten werden Symposien und Workshops zu den Themen:

- ▶ Entwicklung aggressiven und delinquenter Verhaltens
- ▶ Interventionsmöglichkeiten bei delinquenter Jugendlichen
- ▶ Gutachtenerstellung im Strafrecht und Opferentschädigungsrecht
- ▶ Familienrecht und Kinderschutz
- ▶ Diagnostik und Risikoeinschätzung
